Business Insights and Recommendations

Category Concentration

Insight: Computers and Home Appliances contribute to 54% of total sales.

Action: Prioritize inventory, marketing, and pricing strategies around these categories.

Customer Segment Distribution

Insight: Medium Value Segment drives 66% of revenue.

Action: Design loyalty programs, targeted offers or dedicated account management for these customers.

Regional Imbalance

Insight: Certain states (New York, Michigan) show high sales but low AOV. Freistaat Bayern has highest AOV but comparatively low sales.

Action: Adjust discounting strategy or push higher revenue products.

Seasonality and Peak Periods

Insight: December, being the holiday season in most countries, consistently shows peak sales barring 2020 and 2021 (due to the Covid-19 Pandemic lockdowns worldwide). December and February are the busiest months. Busiest sales day always occurs in either December or February.

Action: Align staffing, inventory and campaigns around these two months to maximize revenue and service quality.

Low Customer Conversion

Insight: Certain states have high number of potential customers who do not make any purchases (New South Wales) as the orders made in these states are comparatively lower.

Action: Review pricing and discounts for high revenue generating products. Boost value proposition of brands through social media campaigns. Introduce post-purchase benefits and services for limited time.

Top Selling Categories

Insight: Computers, Home appliances, Cameras are the most profitable categories.

Action: Implement a subscription or replenishment model for top-selling items, and use targeted email flows to offer complimentary items.
